RE: PROJECT SITE WALK

Dear Resident,

The City of Lebanon is announcing that a “Project Site Walk” will be held to discuss the proposed Replacement of Trues Brook Road Bridge over Bloods Brook – NHDOT Bridge No. 066/059 (the eastern bridge, 500 feet east of Derby Lane). The meeting will be held at the project site on Wednesday, June 23, 2021 at 5:30 pm. Attendees are asked to meet on Derby Lane prior to walking the project area.

The City’s Engineer (Hoyle, Tanner & Associates, Inc.) is in the process of completing the preliminary design for the replacement of the existing bridge and reconstruction of approximately 900 feet of Trues Brook Road.

The purpose of the project is to replace the Trues Brook Road Bridge to provide a structurally safe bridge that accommodates the design flood events in a cost-effective manner, while minimizing environmental impacts, construction duration and project costs. The new bridge will also be widened to provide two 11’ wide lanes and two 5’ wide shoulders. The need for the project is due to the structurally deficient condition of the bridge and concerns that a closure is imminent if the bridge is left as is.

The public is encouraged to attend the meeting, provide input and ask questions concerning this project. Exhibits showing the proposed bridge replacement and project impacts will be available to discuss the project on an individual basis. A formal Public Informational Meeting is also anticipated to be held at a future date to be determined.

You may also visit the project website page at [www.lebanonnh.gov/TruesBrookBridge](http://www.lebanonnh.gov/TruesBrookBridge) and subscribe to receive alerts.

If you should have any questions, please contact me via email or phone (listed below).

Sincerely,

Christina Hall, P.E.  
City Engineer
