

**CITY OF LEBANON
DEPARTMENT OF PUBLIC WORKS**

City Engineer
193 Dartmouth College Highway
Lebanon, NH 03766

November 30, 2018

Dear Resident/Property Owner:

As the plans for the Combined Sewer Overflow (CSO) project Phase 12 continue to develop, the City will be conducting a site walk with an arborist who will be able to give us a better understanding as to the potential impacts to the trees and landscaping along the project corridor.

Due to the time of year we are not asking residents to join us on our walk but if you do see us approaching we welcome you to come out and meet us. The walk will be taking place Monday December 10th, 2018 at 2pm. If you have a concern you would like the arborist to view and provide an opinion on, please call or email the Assistant City Engineer Erica.Brittner@lebcity.com.

If you would like to discuss this further, please do not hesitate to contact me.

Sincerely,

Christina Hall, P.E., City Engineer
